Completed	Sunday, 18 October 2026, 8:10 AM
Duration	5 mins 20 secs
Grade	**15.00** out of 15.00 (**100**%)

Question **1**

Correct

Mark 1.00 out of 1.00

In which situation is linear search more efficient than binary search?

a. When the list is large and sorted
b. When the list is small and sorted
c. When the list is small and unsorted ✓
d. When the list is large and unsorted

Question **2**

Correct

Mark 1.00 out of 1.00

What is the key characteristic of binary search?

a. It compares elements sequentially
b. It can be applied only if the list is sorted ✓
c. It works on unsorted lists
d. It always starts from the beginning of the list

Question **3**

Correct

Mark 1.00 out of 1.00

In a linear search, how many comparisons are made in the worst-case scenario to find an element in a list of size n?

a. 1
b. log n
c. n ✓
d. n/2

Question **4**

Correct

Mark 1.00 out of 1.00

During a binary search, what happens if the target element matches the middle element?

a. The search continues in the right sublist
b. The list is sorted
c. The search ends successfully ✓
d. The search continues in the left sublist

Question **5**

Correct

Mark 1.00 out of 1.00

What is searching in the context of computer science?

a. Inserting elements into a list
b. Determining whether an element is present in a list ✓
c. Deleting elements from a list
d. Sorting elements in a list

Question **6**

Correct

Mark 1.00 out of 1.00

Which of the following best describes the process of a linear search?

a. Dividing the list in half repeatedly
b. Checking each element sequentially ✓
c. Sorting the list before searching
d. Skipping every second element

Question **7**

Correct

Mark 1.00 out of 1.00

What is the time complexity of linear search in the worst case?

a. O(n log n)
b. O(log n)
c. O(1)
d. O🥐 ✓

Question **8**

Correct

Mark 1.00 out of 1.00

Which of the following is a type of searching method?

- a. Merge search
- b. Bubble search
- c. Linear search ✓
- d. Quick search

Question **9**

Correct

Mark 1.00 out of 1.00

Which of the following statements about linear search is true?

- a. Linear search requires the list to be sorted.
- b. Linear search can be applied to both sorted and unsorted lists. ✓
- c. Linear search is more efficient than binary search on large lists.
- d. Linear search divides the list into halves.

Question **10**

Correct

Mark 1.00 out of 1.00

What type of search would be most appropriate for finding an element in a list that is frequently updated?

- a. Binary search
- b. Interpolation search
- c. Hash search
- d. Linear search ✓

Question **11**

Correct

Mark 1.00 out of 1.00

In linear search, if the target element is not found in the list, what is the result?

- a. The search is considered unsuccessful ✓
- b. The first element is returned
- c. An error is raised
- d. The last element is returned

Question **12**

Correct

Mark 1.00 out of 1.00

If the target element is greater than the middle element in binary search, where does the search continue?

a. In the left sublist
b. In the right sublist ✓
c. In the middle of the list
d. At the beginning of the list

Question **13**

Correct

Mark 1.00 out of 1.00

In which type of search is the list divided into smaller sublists during the search process?

a. Hash search
b. Linear search
c. Binary search ✓
d. Sequential search

Question **14**

Correct

Mark 1.00 out of 1.00

What is the best-case time complexity of linear search?

a. O(n log n)
b. O👎
c. O(log n)
d. O(1) ✓

Question **15**

Correct

Mark 1.00 out of 1.00

The average case occurs in the linear search algorithm

a. When the item is somewhere in the middle of the array ✓
b. When the item is not the array at all
c. Item is the last element in the array or item is not there at all
d. When the item is the last element in the array
